

# inCard

## ID card design and management software

**inCard** software is designed for ID card design, management and printing. **inCard** provides an ability to create ID card designs, manage databases, enter personal information, acquire photos to the database, and print ready ID cards.

### Basic features of inCard:

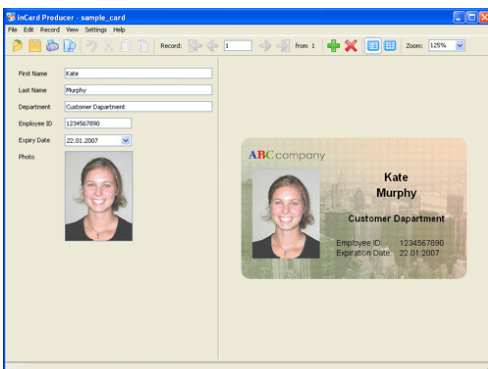

**inCard Designer**

- Two modes – Designer (ID card design and database creation) and Producer (data enter and edit, card printing).
- Ability to create the one sided or two sided ID card designs of standard and user defined formats.
- Ability to manage the internal databases
- Ability to connect to the external databases (ODBC and ADO).
- The following elements can be used for ID card design: fixed text, text from the database, line, rectangle, fixed image, image from the database, bar code, 2D bar code.

**Automatic face recognition and crop**

- Ability to load images from file.
- Ability to capture images to inCard with all cameras having TWAIN driver.
- Unique module of automatic face recognition, crop and enhancement.
- Scan fingerprint using the fingerprint scanner or open fingerprint image from file.

**inCard Producer**

- What You See is What You Get (WYSIWYG) environment. Enter the personal data and they are displayed on the ID card to be printed.
- Easy data search.
- Data presentation in the spreadsheet.
- ID card printing with all printers having standard Windows driver. Print multiple cards on a sheet.
- Support different GUI languages.

### Product Advantages:

- inCard includes the module of automatic face recognition on the captured image.
- inCard GUI is very user friendly, easy to learn and use even for the inexperienced users.
- inCard can be used in the trial mode, so the user has an ability to try it before purchase. The trial version is easily transformed to the full-functional software after payment.
- inCard is very affordable comparing to the competitive products.
